

Need airfreight?

Competing in fast-moving environments can be challenging in the least and nigh on impossible for retailers who do not have a supply chain that can support Speed to Market.

Airfreight, done right, should be fast, consistent and reliable. Businesses should be able to depend on forwarders meeting fast turnaround delivery commitments, so they can confidently plan their operations.

Why airfreight?

- Specialist airfreight partners globally with services from Hong Kong, China, North Asia, India, SE Asia, Europe and North America
- Consolidation services from all major airfreight hubs worldwide
- Specialist airfreight services such as triangles, oversize and Garments on Hangers (GOH)
- Full visibility and milestone tracking, including uplift, ETA, check-in and delivery
- A choice of premium, deferred, consolidated and express services
- 24/7 availability
- Full range of airlines to cater to price and service needs

How you benefit

- Take control over your Speed to Market to respond to trends, reduce inventory costs and meet customer and partner commitments
- Predictable lead-times give you the consistency you need to plan with confidence
- Increased flexibility, including weekend uplifts and deliveries
- Total shipment visibility
- Full end-to-end supply chain management, including customs clearance and transport allows you to realise the full speed to market benefits of airfreight
- Deep operational airfreight experience and expertise allows us to develop the right range of services to meet your specific requirements

When it just HAS to happen
